ABOUT

Mission / Purpose

Our mission at Revolution Gaming is to create a platform that brings gamer-centric, decentralized, and high-quality games to the forefront of the industry, while empowering player ownership. We believe in building a community-driven gaming experience that prioritizes the needs and desires of players, while utilizing decentralized technology to provide a transparent and fair gaming environment. Our goal is to redefine what it means to be a gamer, by permitting players to take an active role in the development of the games they love. We strive to create innovative and immersive games that challenge traditional gaming norms and provide an unparalleled level of player engagement. At Revolution Gaming, we are committed to building a better gaming industry, one that puts players first and celebrates the unique contributions of each individual within our community.

Values

Quality: Revolution Gaming is committed to providing the highest quality gaming experiences for our players. We prioritize the development of excellent graphics, engaging gameplay, and a smooth user interface to ensure our players have a seamless and enjoyable experience.

Decentralization: Revolution Gaming values decentralization and believes in giving players complete ownership and control over NFT assets within games. We use blockchain to ensure transparency and allow for voting on the key developments through a distributed governance system.

Collaboration: Revolution Gaming believes in the power of collaboration and works closely with our community, partners, and content creators to continuously improve and develop games while maintaining a player led experience.

Longevity: Revolution Gaming is committed to building a long-lasting and sustainable financial ecosystem for our players. We believe in providing fair and transparent rewards for players who contribute to the game's success, whether through gameplay, content creation, or other forms of engagement. We also prioritize the long-term growth of the company, ensuring that players can continue to enjoy games developed by Revolution Gaming for years to come.

TEAM

Our distributed team of employees is comprised of top talent in the gaming and blockchain industries. We believe that with our collective expertise and shared commitment, we can create something truly special that will revolutionize the gaming industry.

Name: Michael

Position: Co-Founder, CEO

Bio: Michael is a visionary entrepreneur with a passion for technology and gaming. He has a strong background in finance and has leveraged that experience to build a successful NFT gaming company. Michael is committed to building a sustainable business that delivers value to players and investors alike.

Name: Kim

Position: Co-Founder, COO

Bio: Kim is a seasoned operations professional with a background in gaming and technology. She has a talent for streamlining processes and optimizing business operations. Kim is committed to creating a company culture that values transparency, collaboration, and innovation.

Name: Dan

Position: Co-Founder, CTO

Bio: Dan is a blockchain expert with a passion for gaming. He has a background in software development and has spent the last few years working on blockchain-based applications. Dan is committed to building a decentralized gaming ecosystem that empowers players and creators.

Name: Alice

Position: Senior Game Designer

Name: David

Position: Lead Developer

Name: Rachel

Position: Partnerships Representative

Name: Sofia

Position: 3D Artist

Name: Chen

Position: Software Engineer

If you're a talented and passionate individual who wants to be a part of a hyper-growth company transforming the future of gaming, then send your resume and cover letter to contact@revolutiongaming.io to join our team of dedicated professionals.

GAME DEVELOPMENT

We take great pride in our commitment to developing high-quality games that provide an immersive and engaging experience for our players. Our team of gaming industry veterans utilize a variety of industry-standard frameworks and tools to create games that are both visually stunning and technically robust.

We believe in the importance of game design and user experience, and we work tirelessly to create games that are intuitive and easy to pick up, but also provide depth and challenge for those who seek it. Our games are rigorously tested and optimized to ensure that they run smoothly on a variety of devices and platforms.

To create a truly exceptional gaming experience, we also prioritize collaboration with our community and partners. Through continuous feedback and iteration, we strive to improve our games and keep them fresh and exciting for our players. The development of games can be monitored through roadmaps, which creates clarity between Revolution's Games and the players.

In addition to creating new games, we are committed to supporting our existing games with regular updates and maintenance. Our dedicated team of developers is always working to address issues and add new features to our games, ensuring that they remain enjoyable for years to come.

Overall, we believe that quality game development is at the core of what we do at Revolution Gaming, and we are committed to pushing the boundaries of what is possible in the gaming industry.

ECOSYSTEM

Community

We believe that our community of players, content creators, and other stakeholders is the heart of our platform. We are committed to fostering a positive and inclusive community that welcomes players of all backgrounds and skill levels. We provide a variety of tools and resources to help players get involved in game development, community management, and content creation. We are enthusiastic about the prospect of engaging players in the game development cycle. We are diligently working to finalize the details of this, and we anticipate sharing additional information with our community in the near future.

Decentralization

Decentralization is the key to creating a fair and transparent gaming platform. We use blockchain technology to record all transactions on our platform, ensuring that every player has an immutable record of their ownership and transactions. Our decentralized governance system allows players to vote on key decisions related to game development, community management, and platform governance through holding Revolution Gaming Token. By decentralizing our platform, we are able to create a truly player-centric gaming experience that puts the power in the hands of our community.

NFT Ownership

Revolution Gaming's experiences are uniquely crafted to revolve around NFT ownership, play-to-earn mechanics, and a dynamic player-driven economy. This unique combination allows our players to truly own the assets they acquire in our games, giving them the ability to buy, sell, trade, and use their NFT assets both within and outside of our platform. By providing an ecosystem that empowers players to participate in a thriving player economy, we aim to revolutionize the gaming industry and create a new standard of ownership and engagement for players. Stay tuned for more information on our upcoming games and the innovative player-driven features they will offer.

Partnerships

Revolution Gaming is committed to collaborating with other companies in the blockchain and NFT space to create innovative and engaging gaming experiences for our players. We have formed partnerships with leading blockchain infrastructure providers, NFT marketplaces, and game development studios to help us build the best possible platform. Our partnerships allow us to leverage the expertise and resources of other companies to enhance our platform and bring new games and features to our community. Through strategic partnerships, Revolution Gaming's community can have access to more games, thus accruing more value to the ecosystem.

REVOLUTION GAMING TOKEN (RGT)

Revolution Gaming Tokens (RGT) serve as the universal currency across all games developed under the Revolution Gaming platform, providing players with seamless interoperability and facilitating a player-driven economy. By utilizing a common currency, we enable players to buy, sell, and trade assets across multiple games within our ecosystem, further promoting player engagement and growth. This innovative approach to tokenization empowers our players and ensures a level of ownership and control previously unseen in the gaming industry.

With Revolution Gaming Token you can:

- Gain access and play all games on the platform
- Buy, sell, and gain royalties on assets across multiple games
- Stake RGT for rewards
- Vote on key decision through a distributed governance system
- Invest in the future success of the ecosystem

Tokenomics

The economy of RGT is meticulously designed to reward and incentivize users who actively engage with our games while creating a sustainable ecosystem for our gaming company. We accomplish this by providing practical utility to our token, such as as an in-game currency, staking, governance and rewarding players for both participating and winning games.

To ensure that our token distribution is fair, we utilize a carefully planned allocation strategy that assigns substantial tokens to our pre-sale, play-to-earn, staking, locked supply and exchange liquidity to put majority holding into our community. Additionally, we implement a deflationary model that gradually reduces the total token supply over time and a staking mechanism that encourages users to hold on to their tokens, leading to increased demand and higher token values.

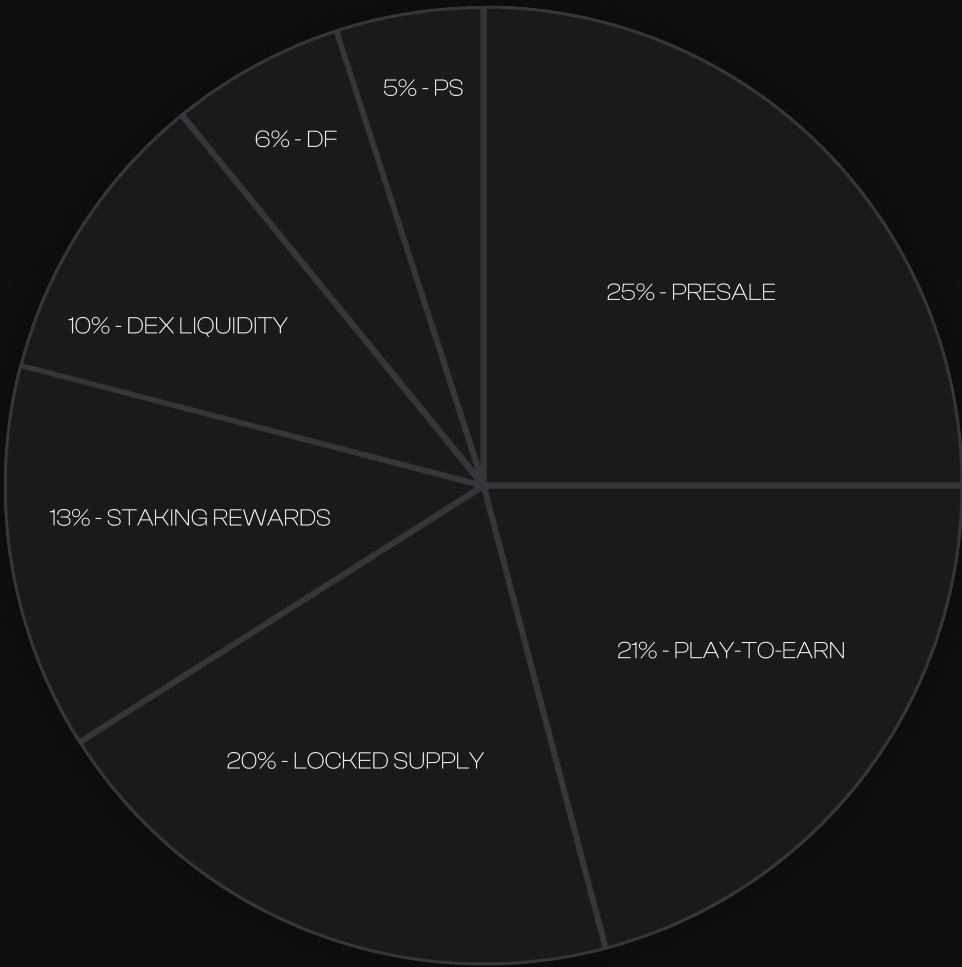

By providing practical utility to our token, implementing fair distribution, and creating a deflationary model, we aim to build trust and establish a strong community around our platform. Users will feel valued and incentivized to participate in our games, leading to a sustainable and vibrant ecosystem.

Deflationary - 1% of tokens are burned after each game or transaction

Interest - 14% annual return when tokens are staked

Governance - the ability to influence future experiences

Token Allocation	Total Amount	%
Play To Earn	210,000,000	21%
Locked Supply	200,000,000	20%
Staking Rewards	130,000,000	13%
DEX Liquidity	100,000,000	10%
Presale	250,000,000	25%
Development Fund	60,000,000	6%
Private Sale	50,000,000	5%
Total Supply	1,000,000,000	100%

PRESALE

Allocating 25% of the token supply for the presale and community giveaways serves the purpose of fostering a sense of community ownership and inclusivity. By providing a significant portion of tokens during the presale, we ensure that early supporters have the opportunity to acquire tokens at an advantageous price, enabling them to participate actively in the project's growth. Simultaneously, dedicating a portion of the supply for community giveaways allows us to engage and reward our community members, encouraging their active involvement and long-term commitment to the project. This approach aims to distribute ownership widely among community participants, aligning their interests with the project's success and fostering a vibrant and dedicated community ecosystem.

Implementing a vesting contract via Merkle trees for our presale provides transparency, security, efficiency, and flexibility. It ensures that investors' vesting schedules are accurately recorded, protected against tampering, and easily verifiable by all parties involved. This technical approach aligns with our commitment to creating a fair and trustworthy presale process, fostering investor confidence and contributing to the overall success of our project.

There are several key reasons behind employing Merkle trees for our presale vesting contract.

1. **Transparency:** By utilizing a Merkle tree structure, we enhance transparency in the vesting process. The root hash of the Merkle tree will be publicly available, enabling anyone to verify the integrity of the vesting schedules without revealing private investor information.
2. **Security:** Merkle trees provide cryptographic security, ensuring that the vesting schedules remain tamper-proof. Even a minor modification in any schedule or investor address would result in a different root hash, alerting all participants to the unauthorized change.
3. **Efficiency:** Merkle trees allow for efficient storage and verification of large amounts of data. With the growing number of participants in the presale, the Merkle tree structure allows us to store and retrieve vesting schedules in a scalable manner.
4. **Flexibility:** Merkle trees offer flexibility in managing vesting schedules. It becomes easier to modify or update individual vesting schedules without impacting the entire structure. This flexibility is crucial in accommodating any changes or adjustments required during the presale phase when allocating giveaway prizes to winners in the community.

STAKING

Staking Amount: The minimum staking amount is set at 1,000 Revolution Gaming Tokens. Stakers must hold at least 1,000 tokens to participate in the staking process.

Staking Period: The staking period is fixed at 90 days (3 months). Stakers must lock their tokens for the entire duration of the staking period.

Reward Rate: The staking reward rate is set at 14% per annum. Stakers can earn an annualized return of 14% on their staked tokens.

Lockup Period: Once stakers participate in the staking process, their tokens are subject to a lockup period of 7 days. During this period, staked tokens cannot be withdrawn or transferred.

Slashing Conditions: Slashing will occur if stakers are found engaging in double signing, equivocation, or any other malicious behavior. Slashing penalties will result in a reduction of the staker's stake by 14%.

Unstaking Period: After the staking period of 90 days ends, stakers are required to go through an unstaking period of 7 days. During this period, staked tokens are locked and cannot be withdrawn.

Validator Selection: Validators are selected based on the size of their stake. The larger the stake, the higher the chances of being selected as a validator.

FUTURE PLANS

Revolution Gaming is committed to continued innovation and growth in the blockchain and NFT gaming space. We have a number of exciting projects in the works, including new game releases, partnerships with leading companies in the space, and platform upgrades that will enhance our players' experience. We are also exploring new ways to leverage blockchain technology to create even more player-centric gaming experiences. Our goal is to be at the forefront of the blockchain and NFT gaming revolution, creating games that redefine what it means to be a gamer.

Roadmap

Q3 2022

- Concept & Ideation

Q4 2022

- Seed funding

Q1 2023

- Development of Marble Mania
- Development of unannounced FPS Game
- Development of unannounced Racing Game
- Revolution Gaming Token contract & NFT Development

Q2 2023

- Revolution Gaming Token Pre-sale
- NFT Mint Release
- Marketing & Cross-community collaboration

Q3 2023

- Revolution Gaming Token contract launch
- Initial Decentralised Exchange Offering
- Release of Marble Mania
- Staking

Q4 2023

- Marble Mania game modes / features / tiers updates
- ICO
- Partnership Announcement
